

Aura Cristina López Carabalí

QA TESTER | FRONTEND DEVELOPER | SOFTWARE ENGINEER

Profile

Enthusiastic Software Engineer with 2+ years of experience, driven by a passion for building reliable, user-friendly digital solutions that improve operational efficiency and user experience. Proficient in JavaScript, React, React Native, HTML & CSS, REST APIs, Postman, Git/GitHub, and agile methodologies, with hands-on experience in QA testing, cross-browser validation, test case design, and defect documentation. Two verifiable production projects: the institutional portal of the Alcaldía de Neiva and the international corporate website of Roma NH Group.

Fast learner with strong attention to detail and a solid foundation in software quality assurance, ready to quickly integrate into teams and bring real value to the company and its customers.

Employment History

Frontend Developer, Roma NH Group

FEBRUARY 2024 — JANUARY 2026 | Remote — International
(Americas & Middle East)

- Developed and launched the corporate website `romanhgroup.com`, a multilingual platform spanning 8+ countries covering hospitality, real estate, and workforce solutions.
- Designed navigation architecture, content structure, and UX, aligned with brand identity and strategic business objectives.
- Implemented and configured the site using GoDaddy Website Builder with contact forms, subscription system, reservations module, and user account management.
- Managed the GitHub repository and version control, ensuring full traceability and platform stability over 2 years.
- Coordinated directly with the company president on requirements, change approvals, and technology alignment.

Frontend Developer (Internship), Alcaldía de Neiva

JUNE 2024 — DECEMBER 2024 | Academic Agreement No. 3510 / 2022

- Redesigned the institutional portal's transparency block applying agile methodology; delivered a modern, citizen-oriented UI.
- Restructured information architecture to meet government transparency standards, improving public-data accessibility.
- Conducted comprehensive cross-browser and cross-device functional testing before production launch.
- Deployed and integrated the redesigned portal into the production environment, ensuring a smooth transition.

Skills

QA Testing

Postman / REST APIs

MySQL / MongoDB

Defect Reporting

Figma

Git

Jira / TestRail

React Native

React

JavaScript

HTML & CSS

Languages

Spanish

English

Digital Coordinator, Sanación y Vida SAS — Healthcare

JANUARY 2021 — PRESENT

- Implemented and managed digital information systems: patient databases, service records, and clinical document workflows.
- Led operational process digitalization, including online scheduling and digital patient communication.
- Managed social media platforms (Instagram, Facebook, TikTok) and produced audiovisual content for healthcare promotion.
- Generated operational indicator reports and digital metrics to support management decisions.

Education

Software Engineering, Corporación Universidad Surcolombiana

GRADUATED AUGUST 2025

Training in software development, systems architecture, databases, data structures, SDLC, and agile methodologies.

Extra-Curricular Activities

QA Tester & Web Developer, Universidad Surcolombiana — Agroinsight Project

UNIVERSIDAD SURCOLOMBIANA, NEIVA

- Participated as part of the QA team for Agroinsight, a mobile application developed at the university, performing functional, regression, and integration testing to ensure app quality and stability.
- Designed and executed test cases, documented defects, and tracked incident resolution throughout the development lifecycle.
- Developed the Agroinsight web platform for user login and registration, featuring a dashboard with key application metrics and relevant information.
- Implemented a report download module on the web platform, allowing users to export data and reports generated by the mobile application.
- Applied agile methodologies throughout the project lifecycle, participating in sprint planning and team collaboration cycles.
- Used Git and GitHub for version control, repository management, and team code collaboration, ensuring traceability of all changes.
